2-day course

4 seats per session

Who is this course for?

BASIC COURSE

For general surgeons with robotic skills who want to master robotic techniques in abdominal wall surgery.

ADVANCED COURSE

For general surgeons with robotic skills who want to learn to perform a robot-assisted transversus abdominis release (roboTAR) independently.

What will I learn?

BASIC COURSE

The trainee will learn key techniques in robotic inguinal hernia repair, including port placement, robotic set-up, abdominal dissection, and mesh fixation within the inguinal space.

ADVANCED COURSE

The trainee will learn advanced techniques in robotic TAR, including robotic set-up, anatomical exploration for transversus abdominis release, and secure mesh fixation.

Who will I learn from?

Dr. Filip Muysoms

AZ Maria Middelaes Hospital Ghent, BE

Included in your course

- Course materials
- Use of procedure-specific training models
